

BUDGIE SANCTUARY RESCUE

Bird Home Safety Checklist

Complete every check before opening the cage for flying time.

OUR NUMBER-ONE RULE

Lock the doors. Close the windows. Then let them fly.

No door or window is opened until every bird is safely secured inside its cage or aviary.

Before flying time

Tick each box every time - do not rely on memory.

- ☐ Front and back doors are closed and locked
- ☐ Every window is securely closed
- ☐ Everyone in the home knows the birds are out
- ☐ Ceiling and portable fans are switched off
- ☐ Cats, dogs and other animals are safely separated
- ☐ Large windows and mirrors are covered or clearly marked
- ☐ Kitchen, hot surfaces and open flames are off-limits
- ☐ Toilets are closed; open water is empty or covered
- ☐ Medicines, cleaners, unsafe foods and small objects are away
- ☐ Electrical cords and narrow gaps have been checked
- ☐ A responsible person will supervise the entire flying time

Household hazards

Check the whole room, not only the exits.

- **Glass**
Cover or mark unfamiliar windows and mirrors.
- **Kitchen**
Avoid heat, boiling water, flames and non-stick fumes.
- **Air**
No smoke, vaping, sprays, fragrances, candles or fumes.
- **Doors**
Check for birds perched on top before closing.
- **Animals**
Securely separate cats, dogs and other animals.
- **Water**
Close toilets and cover or empty open containers.
- **Chewing**
Remove toxic plants, metals, batteries and live cords.
- **Appliances**
Check washers, dryers, dishwashers and recliners.
- **Toys**
Remove loose fibres, rust, sharp parts and trap points.

BEFORE ANY OUTSIDE DOOR OR WINDOW IS OPENED, ASK:

"Are all the birds safely secured?"

There are no exceptions.
